1. Introduction

This document provides instructions for completing *#4103 FMVIEW User Maintenance Form*.

2. Scope

This document gives an overview of FMVIEW, explains the assignment of IDs for accessing FMVIEW, and gives instructions for completing the FMVIEW User Maintenance Form. The information in this document is to be used by the designated FMVIEW Security Contacts in each agency when completing the FMVIEW User Maintenance Form. This form can also be used by the agency's SPAHRS security contacts for requesting access to agency security reports only.

3. FMVIEW Overview

The MMRS Chief Systems Information Officer (CSIO) handles security oversight for the statewide applications of the Department of Finance and Administration, Mississippi Management and Reporting System (MMRS), including FMVIEW.

FMVIEW is the facility used by MMRS for report and print management. It allows designated users (print managers) in an agency to view, selectively print, or re-print reports generated from the Statewide Payroll and Human Resource System (SPAHRS). Reports from agency run payrolls and travel payrolls are also managed in FMVIEW. In the future, SPAHRS security reports will be managed in FMVIEW and available for the agency's designated security contacts for those applications.

Security for FMVIEW for all agencies is maintained by MMRS staff and is tied to the individual user's TPX ID.

Instructions to help designated agency print managers successfully manage print for their agency can be found in the FMVIEW User Manual on the MMRS website, www.dfa.ms.gov/mmrs/ under Applications > FMVIEW > Training Materials.

4. FMVIEW User Maintenance Form Administration

#4103 FMVIEW User Maintenance Form is used to maintain FMVIEW security and is explained below. All FMVIEW security requests must be submitted on the appropriate form and approved by the MMRS CSIO, or designee, before any action is taken to process the request.

It is important that the SPAHRS FMVIEW security contacts understand that security for FMVIEW involves the assignment of a TPX ID in addition to the submission of a request to allow the TPX ID access to FMVIEW. MMRS does not assign or maintain TPX IDs for other agencies. Some agencies have in-house staff that maintain TPX IDs; most rely on the Department of Information Technology Services (ITS) to handle this maintenance. It is the responsibility of the security contacts to ensure that these IDs are created and assigned to users as needed, and revoked if the user leaves the agency or no longer needs access to FMVIEW. The FMVIEW security contact must also request that MMRS delete the FMVIEW access for that TPX ID, using the *#4103 FMVIEW User Maintenance Form*.

The #4103 FMVIEW User Maintenance Form(s) should be faxed to the MMRS CSIO at (601) 359-6551 or mailed/HANDMAIL'ed to:

MMRS Chief Systems Information Officer
Robert Clark Building
301 North Lamar Street, Suite 400
Jackson, MS 39201
MASH@dfa.state.ms.us

Copies of all user maintenance requests are kept on file at MMRS.

When security is set up, the user will receive a confirmation e-mail with links to the MMRS website for the list of the reports he/she has access to and FMVIEW training materials.
