Exercise 1 – Update Equipment Master & Install a Functional Location – IE02

Scenario Objective: A vehicle has been acquired and received. Asset management has set up the asset master, which has generated the equipment (vehicle) master shell. Update the equipment (vehicle) master with the appropriate fleet information.

Required Data

Task	Additional Information
Enter transaction code	IE02
Initial Screen	Change Equipment: Initial Screen
1. Enter Equipment a. Press enter	[see data sheet - Equipment]
2. Enter Object Type a. Press enter	PASSENGER
3. Enter AuthorizGroup	9955
4. Enter Start-up date	[beginning of this month]
5. Enter Aquisition Value 6. Enter Currency Conversion 7. Enter Aquisition Date	25,000 USD [beginning of this month]

<p>8. Click </p> <ul style="list-style-type: none"> i. If prompted, select Class Type ii. Click  Copy b. Enter Class c. Select Sta... (Standard Class) checkbox d. Press enter e. Select the  button 	<p>002 Equipment Class</p> <p>PM_VEHICLE</p> 
<p>9. Select  tab</p> <ul style="list-style-type: none"> a. Enter Maint Plant b. Enter Plant Section (district code) c. Enter Work center d. Enter ABC indic. 	<p>9955</p> <p>999</p> <p>9955-001</p> <p>1</p>
<p>10. Select  tab</p> <ul style="list-style-type: none"> a. Enter Planner group b. Enter Main WorkCtr and Plant c. Enter Catalog profile 	<p>955</p> <p>9955-001 / 9955</p> <p>FLEET</p>
<p>11. Select  tab</p> <ul style="list-style-type: none"> a. Click  Change InstLoc b. Enter Functional loc. c. Click  d. Click  Continue e. Click  f. Click  g. Click  Confirm 	<p>9955-999-FC</p> <p>Data Transfer: Install Equipment screen displays.</p>
<p>12. Click </p> <ul style="list-style-type: none"> a. Enter VIN 	<p>Leave blank for exercise, but complete this step during actual setup</p>

13. Select Vehicle Technology tab a. Enter Usage indicator b. Enter CalculMethod	D Department B Miles Per Gallon
14. Click Save	Save
15. Press enter to acknowledge <u>each</u> message	Keep pressing enter for each message until the initial screen is displayed

Exercise 2 - Create measuring points – IE02

Scenario Objective: The new vehicle must have measuring points assigned. By assigning measuring points to the vehicle, odometer readings, fuel costs and fuel consumption can be recorded. Assign the three measuring points PM_MILES, PM_FUELCOST and PM_FUEL to the equipment (vehicle) master.

Required Data

Task	Additional Information
Enter transaction code	IE02
Initial Screen	Change Equipment: Initial Screen
1. Enter Equipment a. Press enter	[see data sheet - Equipment]
2. Click Measuring points/counters	
3. Click Create Measuring Points	To create the measuring points
4. Click the Back button	
5. Click Measuring points/counters	To look at the measuring points

6. Click the  button	Go to the Location tab
7. Click 	

Exercise 3 – Create Initial Odometer Reading – IK11

Scenario Objective: The initial odometer reading must be documented for the new vehicle. Enter an initial odometer reading of 5000 miles for the equipment (vehicle) and the date is 2 months before today’s date.

Required Data

Task	Additional Information
Enter transaction code	IK11
Initial Screen	Create Measurement Document: Initial screen
1. Place cursor in Measuring point field <ol style="list-style-type: none"> Select  (search the field) or press F4 Click  New Search Select  Enter Equipment Enter MeasPosition Click  Continue 	[see data sheet] PM_MILES
2. Enter MeasTime	[two months ago from current date]
3. Click 	
4. Enter Counter reading	5000

<p>5. Set counter reading externally</p> <p>a. Go to  ->  -> Replace Counter...</p> <p>b. Press Enter</p> <p>c. Select  Total CntrReadg set externally</p> <p>d. Click  to continue</p>	<p>This creates a starting point for the odometer</p>
<p>6. Click </p>	
<p>7. Click  to leave the transaction</p>	

Exercise 4.1 – Create Driver Assignment Request – ZPMFME_DAV_INIT

Scenario Objective: A new driver assignment is required for the newly acquired vehicle. Create the initial driver assignment request.

Required Data

Task	Additional Information
<p>Enter transaction code</p>	<p>ZPMFME_DAV_INIT</p>
<p>Initial Screen</p>	<p>Driver Assignment to Vehicle: Initial Screen</p>
<p>1. Enter Driver ID</p> <p>a. Press enter</p>	<p>[see data sheet]</p>
<p>2. Enter One-Way Distance</p> <p>3. Select Assignment Type</p> <p>4. Enter Requested Start</p> <p>5. Enter Requested End</p> <p>What is the assignment number?</p>	<p>10</p> <p>COMMUTE</p> <p>[beginning of current month]</p> <p>[twelve months from requested start]</p> <p>_____</p>
<p>6. Click </p>	

Exercise 4.2 – Perform Agency Driver Assignment Approval – ZPMFME_DAV_REQ

Scenario Objective: The driver assignment must be approved by the agency. Review the driver assignment request, assign equipment (vehicle) and change the status of the request to indicate the agency approval.

Required Data

Task	Additional Information
Enter transaction code	ZPMFME_DAV_REQ
Initial Screen	Driver Assignment to Vehicle: Selection Screen
1. Click 	
2. Select Assignment Number	[assignment created in last exercise]
3. Click 	
4. Enter Vehicle Number a. Press enter b. Select Approval Status	[see data sheet] PENDING
5. Click 	
6. Click 	
7. Click 	

Exercise 5 – Fleet Data Audit

Scenario Objective: An agency needs to perform their weekly audit of vehicle data. Complete an audit for agency 9955.

Required Data

Task	Additional Information
1. Enter transaction code.	ZPM_Asset_Fleet

<ol style="list-style-type: none"> 2. Enter Business Area 3. Asset Status 4. Press  5. Put the number of records in Active Vehicle Asset field on the Data Checklist form. 	<p>9955 Active</p>
<ol style="list-style-type: none"> 6. Enter transaction code. 	<p>IE36</p>
<ol style="list-style-type: none"> 7. Enter Maintenance plant 8. Press  9. Highlight column "C" (Equipment Category) 10. Press Control + F 11. Put F in the Search Term field 12. Put a check mark by Display Number of Hits 13. Press  14. Write the number of hits in the Number of Active Equipment records field on the Data Checklist form 	<p>9955</p>
<ol style="list-style-type: none"> 15. Enter transaction code 	<p>ZPM_Asset_Fleet</p>
<ol style="list-style-type: none"> 16. Enter Business Area 17. Asset Status 18. Press  19. Select/Highlight the Fuel Cost column. 20. Click Set Fliter 21. Double click within the field 22. Select Single Value 23. Press  24. Enter 0.00 within the field 25. Press  26. Count the number of records with "0.00" in the Fuel Cost column and write that number in the Number of records missing cost data field on the Data Checklist form. 27. Select/Highlight the Fuel Cost column 28. Click Set Filter 29. Select  (delete filter) 30. Press  	<p>9955 Active</p>
<ol style="list-style-type: none"> 31. Select/Highlight the Maintenance Cost column. 32. Hold the CTRL button and select the Repair Cost column 33. Click Set Fliter 	

<p>34. Double click within Maintenance Cost field</p> <p>35. Select Single Value</p> <p>36. Press </p> <p>37. Enter 0.00 within Maintenance Cost field</p> <p>38. Double click within Repair Cost field</p> <p>39. Select Single Value</p> <p>40. Press </p> <p>41. Enter 0.00 within Repair Cost field</p> <p>42. Press </p> <p>43. Count the number of records with “0.00” in both columns and write that number in the Number of records missing cost data field on the Data Checklist form.</p> <p>44. Select/Highlight the Maintenance Cost column.</p> <p>45. Hold the CTRL button and select the Repair cost column</p> <p>46. Click Set Filter</p> <p>47. Select  to delete both filters</p> <p>48. Press </p>	
<p>49. Select/Highlight the <u>Odometer Reading</u> column.</p> <p>50. Click Set Filter</p> <p>51. Double click within Odometer Reading field</p> <p>52. Select Single Value</p> <p>53. Press </p> <p>54. Enter 0.00 within Odometer Reading field</p> <p>55. Press </p> <p>56. Count the number of records with “0.00” in the Odometer Reading column and write that number in the Number of records missing odometer field on the Data Checklist form.</p> <p>57. Select/Highlight the Odometer Reading column</p> <p>58. Click Set Filter</p> <p>59. Select  to delete filters</p> <p>60. Press </p>	
<p>61. Select/Highlight <u>Miles Driven</u> column</p> <p>62. Click Sort in Descending Order</p> <p>63. Count the number of records that have over 1,000,000 in the Miles Driven column and write that number in the Number of vehicles with odometer reading over 1,000,000 field on the Data Checklist form.</p>	

<p>64. Select/Highlight the Functional Location column</p> <p>65. Click Set Filter</p> <p>66. Click the search within the field and select the functional location ending with "FC".</p> <p>67. Press </p> <p>68. Count the number of records with a functional location that ends with FC and does not have a valid Driver Assignment. Write that number in the Number of vehicles requiring Driver Assignments field on the Data Checklist form.</p> <p>69. Select/Highlight the Functional location column</p> <p>70. Click Set Filter</p> <p>71. Select  to delete filters</p> <p>72. Press .</p>	
<p>73. Select/Highlight County column</p> <p>74. Click Set Filter</p> <p>75. Double click within County field</p> <p>76. Select Single Value</p> <p>77. Press </p> <p>78. Click the search within the field and select the blank county</p> <p>79. Press </p> <p>80. Press </p> <p>81. Count the number of records without a value in the County column and write that number in the Number of vehicles that do not have the county field on the Data Checklist form.</p>	

Exercise 6 – Create Historical (Statistical) Order and Post Statistical Costs – IW61

Scenario Objective: After an oil change by a contract vendor, a historical (statistical) order is generated to statistically capture the maintenance costs on the vehicle.

Required Data

Task	Additional Information
Enter transaction code	IW61
Initial Screen	SAP

1. Enter Historical/Statistical data a. Enter Order Type b. Enter Reference Date c. Select Priority d. Enter Equipment	PM02 (Preventative maintenance) [previous working day] 2-High [see data sheet]
2. Click  a. Enter description b. Enter PMActType c. Press enter	[9955-Jack's Auto Shop - Change oil and filter] COF
3. Select  tab a. Select  sub-tab b. Enter Services Costs c. Click Enter	35.00
4. Select  sub-tab	
5. Click 	
6. Click  to leave the transaction	

Exercise 7 – Create Measurement Documents for Equipment – IK22

Scenario Objective: Manually enter the fuel posting for 2 weeks prior to current date. The odometer value was 4000 miles, fuel cost was \$40, and fuel consumption was 15 gallons.

Required Data

Task	Additional Information
Enter transaction code	IK22
Initial Screen	Collective Entry of MeasDocuments: Initial screen
1. Enter Equipment	[see data sheet]
2. Enter Meas Time	[2 weeks prior to current date]

3. Click Collective Entry	
4. Click All Measuring Points on Object For fuel consumption, is the counter reading or the difference entered? For fuel cost, is the counter reading or the difference entered? For odometer, is the counter reading or the difference entered for odometer? a. Enter CounterRdgDifference for Fuel Consumption b. Enter CounterRdgDifference for Fuel Cost c. Enter Rdg/CtrRdg (Reading / Counter reading) for Odometer d. Press Enter (twice)	_____ _____ _____ 15 40 4000
5. Click Save	
6. Click Exit to leave the transaction	

Exercise 8 – List Measurement Documents and Set Reversal Indicator – IK18

Scenario Objective: One of the measurement documents was entered incorrectly. Generate a list of measurement documents for the equipment (vehicle) and set the reversal indicator.

Required Data

Task	Additional Information
Enter transaction code	IK18
Initial Screen	Change Measurement Documents: Measurement Document Selection
1. Enter Equipment a. Select Reversal indicator b. Enter No. of MeasDocs by MeasPoint c. Click Execute	[see data sheet - Equipment 1] <input checked="" type="radio"/> with or without 99999

2. Click  Select Item a. Click 	[measurement document PM_MILES as 4000]
3. Click  and follow menu path:	<i>Measurement Document > Functions > Reversal Indicator > Set</i>
4. Click 	
5. Click 	

Exercise 9 – Deactivate Equipment Record

Scenario Objective: The vehicle was wrecked, and it needs to be deactivated.

Required Data

Task	Additional Information
Enter transaction code	IE02
Initial Screen	Change Equipment: Initial Screen
1. Enter Equipment number	Use Equipment 1 from Data sheet
2. Press Enter	
3. Click  and follow menu path: Equipment Functions Active <-> Inactive Deactivate	<i>Equipment > Functions > Active<->Inactive > Deactivate</i>
4. Select  tab	
5. Click  :
