

# Value Formulary Quick Reference List

The **Value Formulary Quick Reference List** is not an all-inclusive list but represents a summary of prescribed medications within select therapeutic categories. This useful reference tool can assist medical providers in selecting therapeutically appropriate and cost-effective products for their patients. Preferred brand-name medications are listed to help identify product that are clinically appropriate and cost-effective. Generics listed in therapeutic categories are for representational purposes only.

This list represents brand products in CAPS and generic products in lowercase *italics*. Unless specifically indicated, drug list products will include all dosage forms, except for orally disintegrating formulations. Some prescription benefit plan designs may alter coverage of certain products or vary copay amounts based on the condition being treated. This document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, preference for brands and mandatory generics whenever available.

This list is not an all-inclusive list and does not guarantee coverage. Please visit [Caremark.com](http://Caremark.com) for a complete list.

**FOR YOUR INFORMATION:** This drug list represents a summary of prescription coverage. It is not all-inclusive and does not guarantee coverage. In most instances, a brand-name drug for which a generic product becomes available will become non-formulary, with the generic product covered in its place, upon release of the generic product to the market. Unless specifically indicated, drug list products will include all oral dosage forms, except for orally disintegrating formulations. This list represents brand products in CAPS and generic products in lowercase *italics*. Listed products may be available generically in certain strengths or dosage forms. Dosage forms on this list will be consistent with the category and use where listed. Log in to [Caremark.com](https://www.caremark.com) to check coverage.

An exception process may exist for specific clinical or regulatory circumstances that require coverage of a removed medication.

\* For use in patients previously treated with an HCV regimen containing an NS5A inhibitor (for genotypes 1-6) or sofosbuvir without an NS5A inhibitor (for genotypes 1a or 3).

<sup>1</sup> An ACCU-CHEK or ONETOUCH blood glucose meter may be provided at no charge by the manufacturer to those individuals currently using a meter other than ACCU-CHEK or ONETOUCH. For more information on how to obtain a blood glucose meter, call: 1-877-418-4746.

<sup>2</sup> Listing does not include certain NDCs. Drug products are identified by unique numerical product identifiers, called National Drug Codes (NDC), which identify the manufacturer, strength, dosage form, formulation and package size.

This document contains references to brand-name prescription drugs that are trademarks or registered trademarks of pharmaceutical manufacturers not affiliated with CVS Caremark®. Listed products are for informational purposes only and are not intended to replace the clinical judgment of the prescriber. The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.
