Value Formulary

INTRODUCTION

We are pleased to provide the 2023 **CVS Caremark Value Formulary** as a useful reference and informational tool. This document can assist practitioners in selecting clinically appropriate and cost-effective products for their patients.

The drugs represented have been reviewed by a National Pharmacy and Therapeutics (P&T) Committee and are approved for inclusion. The document is reflective of current medical practice as of the date of review.

The information contained in this document and its appendices is provided solely for the convenience of medical providers. We do not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. This document is not intended to be a substitute for the knowledge, expertise, skill and judgment of the medical provider in his or her choice of prescription drugs. All the information in the document is provided as a reference for drug therapy selection. Specific drug selection for an individual patient rests solely with the prescriber.

The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

We assume no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

PREFACE

The document is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action. Drugs represented in this document may have varying cost to the plan member based on the plan's benefit structure. Some prescription benefit plan designs may alter coverage of certain products or vary copay amounts based on the condition being treated. Generic medications typically are available at the lower cost, brand-name medications on the document will generally cost more than generics. Generics should be considered the first line of prescribing subject to applicable rules.

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The services of an independent National Pharmacy and Therapeutics Committee ("P&T Committee") are utilized to approve safe and clinically effective drug therapies. The P&T Committee is an external advisory body of clinical professionals from across the United States. The P&T Committee's voting members include physicians, pharmacists, a pharmacoeconomist and a medical ethicist, all of whom have a broad background of clinical and academic expertise regarding prescription drugs. Employees with significant clinical expertise are invited to meet with the P&T Committee, but no CVS Caremark employee may vote on issues before the P&T Committee. Voting members of the P&T Committee must disclose any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

DRUG LIST PRODUCT DESCRIPTIONS

There are two ways to find your drug on this drug list:

1. Medical Conditions

The drugs on this drug list are grouped by the type of medical conditions they are used to treat. For example, drugs used to treat a heart condition are listed under Cardiovascular. If you know what your drug is used for, look for the category name in the list and then look under the category name for your drug.

2. Alphabetical Listing

If you are not sure what category to look under, look for your drug in the Index at the end of the drug list. The Index is an alphabetical list of all drugs in this document. Both brand-name drugs and generic drugs are in the Index.

- Look in the Index and find your drug.

- Next to your drug, see the page number where you can find the coverage information.
- Turn to the page listed in the Index and find the name of your drug in the first column of the list.

The first column of the chart lists the drug name. Brand-name drugs are capitalized (e.g., LIPITOR). Generic drugs are listed in the lower-case italics (e.g., *atorvastatin*).

The information in the Requirements/Limits column tells you if there are any special requirements for coverage of your drug. Their requirements and limits may include:

- **Prior Authorization:** Your plan needs you (or your doctor) to get prior approval or authorization for certain drugs. This means that you need to get approval from your plan before you fill your prescriptions.
- **Quantity Limits:** For certain drugs, your plan limits the amount of the drug that it will cover. Your plan may also limit the amount of drugs you may receive within a class of drugs. For example, for opioid-naïve members aged 19 or younger, certain drugs within the opioid class are limited to a three-day or less supply.
- **Step Therapy:** Your plan needs you to try certain drugs as the first step to treat your medical condition before covering another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, your plan may not cover Drug B unless you try Drug A first. If Drug A does not work for you, your plan will then cover Drug B. If you don't get approval, your plan may not cover the drug.

LEGEND

Symbol	Name
AGE	Age Limit
OTC	Over the counter
PA	Prior Authorization
PA*	If Quantity Limit is exceeded, Prior Authorization may apply
PA**	If Step Therapy requirements are not met, Prior Authorization may apply
QL	Quantity Limit
SP	Specialty Drug
ST	Step Therapy

GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product. In most instances, a brand-name drug for which a generic product becomes available will become non-formulary, with the generic product covered in its place, upon release of the generic product to the market. However, the document is subject to state specific regulations and rules regarding generic substitution and mandatory generic rules apply where appropriate.

Generic drugs are usually priced lower than their brand-name equivalents. Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and effectiveness and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug (bioequivalence). Generics may be different from the brand in size, color and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug (therapeutic equivalence).

SPECIALTY MEDICATIONS

A new, rapidly growing category of drugs, specialty medications are the result of continued advances in drug development technology and design. They are created to target and treat complex chronic or genetic medical conditions and include bioengineered proteins, blood-derived products and complex molecules. The therapeutic categories listed below include products that are covered as part of the Specialty benefit.

Acromegaly	Mental Health Conditions
Alpha-1 Antitrypsin Deficiency	Miscellaneous
Amyloidosis	Movement Disorders
Anemia	Multiple Sclerosis
Asthma	Neutropenia
Atopic Dermatitis	Ocular Disorders
Cardiac Disorders	Oncology - Injectable
Coagulation Disorders	Oncology - Oral/Topical
Cryopyrin-Associated Periodic Syndromes	Osteoporosis
Cystic Fibrosis	Paroxysmal Nocturnal Hemoglobinuria
Electrolyte Disorders	Phenylketonuria
Gastrointestinal Disorders-Other	Pre-Term Birth
Gout	Psoriasis
Growth Hormone & Related Disorders	Pulmonary Arterial Hypertension
Hematopoietics	Pulmonary Disorders - Other
Hemophilia, Von Willebrand Disease & Related Bleeding Disorders	Rare Disorders - Other
Hepatitis	Renal Disease
Hereditary Angioedema	Respiratory Syncytial Virus
HIV Medications	Rheumatoid Arthritis
Hormonal Therapies	Seizure Disorders
Immune Deficiencies & Related Disorders	Sickle Cell Disease
Infectious Disease - Other	Sleep Disorders
Inflammatory Bowel Disease	Systemic Lupus Erythematosus
Iron Overload	Thrombocytopenia
Lysosomal Storage Disorders	Transplant
	Urea Cycle Disorders

Specialty Guideline Management (SGM)

SGM is our utilization management program that helps ensure appropriate utilization for specialty medications based on currently accepted evidence-based medicine guidelines. The utilization management program is available for therapeutic areas dispensed by our specialty pharmacies. SGM is designed to help ensure safety and efficacy while preventing off-guideline utilization. Medications which may be included in the SGM program are identified in the document as "SP" for your reference. For additional information, please refer to CVSspecialty.com or to submit a prior authorization, please call 1-866-814-5506.

PLAN DESIGN

Preferred brand-name medications are listed to help identify products that are clinically appropriate and cost-effective. Generics listed in therapeutic categories are for representational purposes only. Certain medications on the list are covered if utilization management criteria are met (i.e., Step Therapy, Prior Authorization, Quantity Limits, etc.); requests for use of such medications outside of their listed criteria will be reviewed for medical necessity. If a medication is not listed on the document, a formulary exception may be requested for coverage. Medical necessity or formulary exception requests will be reviewed based on drug-specific prior authorization criteria or standard non-formulary prescription request criteria.

Special note for opioid containing products: The quantity of opioid product prescribed (including those that are combined with acetaminophen, aspirin, or ibuprofen) will be limited to up to 90 morphine milligram equivalents (MME) per day based on a 30 day supply. Members who are opioid-naïve will be required to use an immediate-release (IR) formulation before moving to an extended-release (ER) formulation and will be subject to quantity limit restrictions.

Individual pharmacy benefit plans may impose restrictions or not reimburse some products. In addition, over-the-counter (OTC) products, with the exception of insulin and diabetes monitoring products, are usually not included in the pharmacy benefit. If covered in the pharmacy benefit, OTC products require a valid prescription.

Log in to [Caremark.com](#) to check coverage.

PREVENTIVE SERVICES

The U.S. Department of Health and Human Services (HHS) has adopted Guidelines for Preventive Services under the Affordable Care Act (ACA). Under the ACA, some pharmacy benefit plans may provide a range of preventive services for \$0 member cost share. These items may include:

- Bowel Preparations for Colorectal Cancer Screening
- Fluoride Supplementation in Children
- Folic Acid Supplementation
- Tobacco Use Counseling and Cessation Intervention
- Immunizations
- Medications for Risk Reduction of Primary Breast Cancer
- Contraceptives
- Statin Use for the Primary Prevention of Cardiovascular Disease in Adults
- Antiretroviral therapy for preexposure prevention of human immunodeficiency virus (HIV) infection
- Diabetes Prevention Medicine for preventing or delaying diabetes for adults age 35 to 70 who have overweight or obesity

Items that may be covered as preventive services under this formulary will not be specifically noted since final coverage is determined by the plan sponsor.

NOTICE

The information contained in this document is proprietary. The information may not be copied in whole or in part without written permission. ©2022 CVS Health and/or one of its affiliates. All rights reserved.

This document contains references to brand-name prescription drugs that are trademarks or registered trademarks of pharmaceutical manufacturers not affiliated with CVS Caremark.

Please be advised that this document is updated periodically and changes may appear prior to their effective date to allow for client notification.
