

MISSISSIPPI INTERACTIVE

WHAT WE DO

Mississippi Interactive designs, manages and hosts electronic government services for the State of Mississippi. Our eGov solutions use technology to increase efficiency and reduce costs for state agencies and their constituents.

eGov services offered by MSI include:

- Web-Based Application Development – MSI develops each agency application as a custom solution at no to low cost to the agency. We will never pull software from the shelf; your application is built for you to fit your needs.
- Online Payment Processing – MSI accepts all major credit cards (Visa, MasterCard, Discover and American Express)
- Point of Sale – Over the counter solution for processing payments via card swipe hardware.

MSI also provides ongoing support including:

- Customer Support for payment and application questions via email or phone
- Marketing for the application or service to increase adoption
- Any applicable training to agency employees

HOW WE DO IT

Mississippi Interactive's solutions are self-funded. In most cases, Mississippi interactive absorbs the costs to build the technical infrastructure and develop the electronic government services.

In order to build these services at not cost to the State an eGov fee is included in each transaction and is paid by the end user. If the eGov fee model is chosen by the requesting agencies services are designed, hosted and maintained at no cost to the agency.

WHO WE ARE

Mississippi Interactive (MSI) is the digital government partner for the State of Mississippi. Established in December 2010, MSI is a wholly owned subsidiary of NIC Inc. of Olathe, Kansas.

MSI was selected as the state's partner of electronic government (eGov) services through the State's competitive bid process under project Mississippi Interactive – DFA – 37577-3564-Dec2010. The award of this contract allows any Mississippi state agency, board or commission to partner with Mississippi Interactive to provide a multitude of eGov services.
