Data Analyst III

About the Agency

The Mississippi Department of Finance Administration (DFA) plays a critical role in the administration's mission to implement a more efficient and effective government for all Mississippians. From ensuring State employees receive their pay to maintaining the State's historic buildings, DFA is vital to helping us continue putting Mississippians first. This position is located in the OIT Department of DFA.

About the Position

The MS Department of Finance & Administration is seeking a Data Analyst III for the Office of Information Technology. The position's primary duties will include database administration and maintenance for DB2, query writing in Microsoft SQL and Oracle SQL, support of existing web-driven database applications, analysis and implementation of requested enhancements, review of complex data sets, database problem resolution, and hands-on custom support.

What you'll need to be Successful

This position requires experience in administration, maintenance, and end-user support of DB2 databases, experience with Data Studio and Microsoft SQL. Oracle SQL experience will provide an additional advantage. Documentation writing, coding, testing and debugging experience along with strong troubleshooting, analytical, problem-solving skills are a necessity. Must be detail-oriented, customer focused, and customer satisfaction driven.

Preferred Qualifications

Typically requires a bachelor's degree and 5-8+ years of IT experience with emphasis in database management.

Salary Range: $65,779.54 - $86,335.64
